

Trial: Humifirst WG on Wombok

- Crop:** Wombok (Chinese Cabbage) var. Matilda
- Product:** Humifirst Wg
- Aim:** Improve lateral roots, Improve Root Biomass
- Application:** 1 X 2 kg /ha by drip
- Timing:** 2nd water after planting
- Rate:** 2 kg /ha
- Assessment:** Visual assessment

Results – Visual Root Assessment

Control

- Stunted root ball since transplant
- Poor initiation of field roots

Humifirst WG 2 kg /ha

- Increased root biomass
- Excellent initiation of roots post transplant
- Increased root biomass

Humifirst WG:

- Increased Root Branching & Fine Roots post transplant
- Increased Root Biomass
- Reduced transplant shock

**Humifirst WG @ 2 kg /ha
@ planting increases
Wombok Root length & biomass**
