

NUTRITIONAL PROGRAM

APPLE

 soil application
 foliar application

OBJECTIVE	Post-harvest	Dormancy	Silver Tip	Leaf Development	Pre-flowering	Flowering	Petal Fall	Fruit Set	Fruit Development	Maturing Fruit
Fine root development & nutrient uptake	 humifirst WG 2 kg /ha		 humifirst WG 2 kg /ha							
Prevention & correction of Fe chlorosis			 ultraferro 10-50 g /tree or 4 kg /ha 3 applications 21 days apart							
Prevention of Zn & Mn deficiencies	 tradecorp Zn 1-1.5 kg /ha		 tradecitrus (Zn+Mn) 1.5 kg /ha					 tradecitrus (Zn+Mn) 1 kg /ha 1 application		
Vegetative development			 trafos synergy 5 L/ha 2 application 14 days apart							
Better flowering & fruit set	 tradebor 3 L /ha			 tradebor 3 L /ha				 tradebor 3 L /ha 2 applications every 10-14 days		
Additional Calcium with no N, K, S, Cl				 calfresh 3 kg /ha				 calfresh 3-4 kg /ha applied every 7-14 days		
Prevent bitter pit, increase skin quality & bulking								 systacal plus 2 kg /ha 5-10 applications every 7-10 days		
Photosynthesis & ATP activation			 systemag 2 kg /ha 2 applications 21 days apart					 systemag 2 kg /ha 2 applications every 28 days apart		
Improved fruit colour & weight	 amifol K 5 L /ha							 amifol K 4 L /ha 2-3 applications every 14 days		
Speed up leaf fall	 tradecorp Cu 4-6 kg /ha									

DO NOT APPLY

NB: Apply Lower 7[®] in the irrigation system for acidifying irrigation water and neutralizing bicarbonates. Adjust water and spraying solution to a pH between 5-6 to get maximum efficacy
