

turbo root WG

Complete Starter Fertilizer containing Humic Acid, L- α Free Amino Acid, NPK and EDTA micronutrients, 100% soluble

GUARANTEED CONTENTS:

	w/w
Total Humic Extract (THE):	29.1
Humic acids:	14.0
Fulvic acids:	15.1
L- α Free Amino Acid:	22.2
Nitrogen:	3.0
Phosphorus (P) soluble in water:	7.0
Potassium (K) soluble:	15.0
Iron (Fe) soluble in water and chelated by EDDHA:	0.1
Manganese (Mn) soluble in water and chelated by EDTA:	0.2
Zinc (Zn) soluble in water and chelated by EDTA:	0.2
Molybdenum (Mo) soluble in water:	0.3

pH stability range of chelated fraction: 3-11

turbo root WG

Turbo Root WG is a 100% soluble root stimulating starter fertilizer. It contains Humic and Fulvic Acids to stimulate fine root development while enhancing the physical chemical and biological characteristics of the soil. The L- α Free Amino Acids stimulate germination and root growth while reducing plant stress such as transplant shock. A high concentration of P & K further encourage strong root and stem development, ensuring excellent crop establishment even in unfavourable environments. Turbo Root WG is recommended on all crops during the initial stages of the vegetative cycle.

DOSAGE AND METHOD OF USE

Application	Crop	Rate (kg /Ha)	No. of Applications	Comments
Drip	General	2 - 4	2 - 3	Apply every 7 - 10 days after sowing or transplanting during the initial stages of the crop
	Strawberry	2 - 4	3 - 5	Apply from transplanting of the root stock every 7 days
	General (Poly Tunnel)	0.8 - 1 kg / 2000 m ²	3 - 5	Apply from transplanting every 10 - 14 days. Use 800 g Turboroot for 6000 plants or 1 kg for 8000 plants
Water Wheel	General	0.5 kg /100L	1	Apply using water wheel at transplanting
Potting Mix	General	1 kg /m ³	1	Spray onto substrate during preparation or mixing

COMPATIBILITY

Turboroot WG is compatible with most commonly used fertilizers and agrochemical products except Calcium Nitrate, Sulphur, products that contain Copper, mineral oils and acid reaction products and herbicides that are not compatible with organic matter. It is recommended to carry out a test before preparing any mixtures and to consult technically authorized personnel

HANDLING AND STORAGE

This product is extremely hygroscopic. Any unused product must be sealed airtight immediately.

Keep out of the reach of children. Do not eat, drink or smoke when using this product. Store in a fresh, dry and keep away from extreme temperatures. Keep only in original container. Use the product according to de instructions in this label. In case of doubt, please contact authorized technicians. To optimise the speed of dissolution and to avoid the formation of lumps, it is recommended that the product be added slowly to the mixing tank with the agitator running and mixed until total dissolution is achieved

Disclaimer: The recommendations and information provided comes from several trials and studies that have been undertaken, however, during the application of the product several factors out of our control may take place (tank mixes, application, climatic conditions, etc.). Any recommendation must serve as a guide and be adapted to local conditions.
