# tradeferro K6 WG

Tradeferro K6 WG is an Iron (6%) EDDHA chelate combined with Potassium (9.1%) in a chemical mix. Potassium has a synergistic effect with Iron in plant nutrition enhancing Iron uptake, increasing the efficiency of the product.

The EDDHA in Tradeferro K6 WG is suitable for a wide range of soils including calcareous and alkaline soils ranging from pH 3 – 11.

## DOSAGE AND METHOD OF USE

Application	Crop	Rate (kg /Ha)	No. of Applications	Comments
Fertigation	General Dose	2 - 4 1 - 2 /10,000L Water	2 - 6	Apply splits from middle of vegetative stage until fruit set.
Hydroponics	General Dose	1 - 1.5 kg /1000L (x100)	-	Use 1L of mother stock solution /100L irrigation water.
Soil	Orchard (Establishment)	10 g /tree	1	Apply at establishment.
	Orchard (Early Production)	20 - 40 g /tree	1	Apply pre-flowering.
	Orchard (Full Production)	50 - 90 g /tree	1	Apply pre-flowering.
	Vegetables	1 - 7 g /m <sup>2</sup>	1	Apply before sowing, transplant or the beginning of plant growth.
Flowers	General Dose	0.5 g /L	Weekly	Water weekly.

## DIRECTIONS FOR USE

Iron EDDHA should be applied by fertigation or as a soil spray for maximum efficacy. When applied as a foliar spray Iron EDDHA is degraded by strong UV light, and is not recommended.

## COMPATIBILITY

Tradeferro K6 WG is compatible with most commonly used fertilizers and agrochemical products. It is recommended to carry out a test before preparing any mixtures and to consult technically authorized personnel.

## WARNINGS, HANDLING AND STORAGE

Keep out of reach of children. Do not eat, drink or smoke when using this product. Store in a fresh, dry place and keep away from extreme temperatures. Keep only in original container. Use the product according to the instructions in this label. In case of doubt, please contact authorized technicians. To be used only where there is a recognised need. Do not exceed the appropriate dose rates.

**Disclaimer:** The recommendations and information provided comes from several trials and studies that have been undertaken, however, during the application of the product several factors out of our control may take place (tank mixes, application, climatic conditions, etc.). Any recommendation must serve as a guide and be adapted to local conditions.
